

## Powerful Performance

The Boston Bravo 20 is a multipurpose, high performance loudspeaker whose unique design fits discreetly anywhere in your home – especially on walls, in corners, and other tight locations. Sometimes called the on-wall/in-wall, the Bravo 20 is the perfect choice when you want the speaker to disappear, but can't cut holes in your walls. Its metal grille and contemporary styling also make it the ideal solution for your wall-mounted TV.

The Bravo 20's quarter-cylinder, wedge-shaped housing contains a 4½-inch woofer and a 1-inch VR® aluminum dome tweeter with AMD™. An adaptable mounting bracket allows it be placed in a wide variety of locations for optimum sound quality and three-dimensional imaging. When a pair is placed vertically in the corners of a room, the Bravo 20 creates a surprisingly wide sonic window, providing true stereo sound reproduction over a broad area. A unique air channel leading to the exterior vent contributes to the speaker's thin profile while allowing it to breathe openly and provide deep bass response.

To match any décor, the Bravo 20 is available in black or white.

## Key features

- Unique wedge-shape design allows for placement in corners, ceilings, and other tight locations
- Accurate sound dispersion in both vertical and horizontal positions
- VR® Aluminum dome tweeter with AMD™ delivers smooth, natural highs
- Vented enclosure extends low frequencies
- Versatile mounting brackets and hardware included
- Available in black or white with matching metal grille
- Mount Bravo 20 directly to a single gang electrical box in new construction

## Placement Options

**CORNER** / Corner placement is discreet yet ideal for theater, stereo, or whole-house applications. Its unique bracket and 90° corner inserts create a tight, flush fit.

**FLOOR** / For a completely hidden system, or a unique surround effect, Bravo 20 can also be positioned in the corner of a floor and wall.

**WALL** / Mounting Bravo 20 flush to a wall is equally simple when the corner inserts are removed from the speaker.

**CEILING** / Horizontal placement against the wall/ceiling corner offers exceptional, wide-area dispersion, and the ultimate in out-of-the-way placement—perfect for commercial applications too.

## Specifications

<b>Frequency Response (±3dB):</b>	80Hz – 20kHz
<b>Recommended Amplifier Power:</b>	15 – 125 watts
<b>Nominal Impedance:</b>	8 ohms
<b>Sensitivity [1 watt (2.83v) at 1m]</b>	89dB
